Letters to the Editor

The magnetic field strength in the emission line region of the AM Her system EF Eridani (= 2A0311-277)	
Seifert, W., Östreicher, R., Wunner, G., Ruder, H.	L1
Equations of state of hot dense matter	
Lassaut, M., Flocard, H., Bonche, P., Heenen, P.H., Suraud, E.	L3
Discovery of a magnetic DA white dwarf with distinct H β and H α Zeeman triplets	
Hagen, H.-J., Groote, D., Engels, D., Haug, U., Toussaint, F.	L7
Status of the Perseus optical flasher	
Corso, G.J., Ringwald, F.A., Harris, R.W.	L9
Metals in IRC + 10216: detection of NaCl, AlCl and KCl, and tentative detection of AlF	
Cernicharo, J., Guélin, M.	L10
CO ($J=1-0$) observations of bright carbon stars	
Olofsson, H., Eriksson, K., Gustafsson, B.	L13
The pulsewidth-age relation of radio pulsars	
Candy, B.N., Blair, D.G.	L17
Doppler-effect modulation of the observed radiation flux from ultracompact binary stars	
Shakura, N.I., Postnov, K.A.	L21
Detection of vibrationally excited SiS in IRC + 10216	
Turner, B.E.	L23
Could there be terrestrial signatures of the EUV pulse from Supernova 1987 A?	
Ögelman, H., Böhringer, H., Buchert, S., Çakır, S., LaBelle, J., Treumann, R.A.	L27
Cosmology	
A study of the elongation of Abell clusters. I. A sample of 37 clusters studied earlier by Binggeli and Struble & Peebles	
Rhee, G.F.R.N., Katgert, P.	217
Extragalactic astronomy	
(RN) The Seyfert 2 galaxy IC 184 and its surrounding group	
Kollatschny, W., Fricke, K.J.	9

Markarian 297 knots	
Hecquet, J., Coupinot, G., Maucherat, A.J.	13
The optical spectral index in the south radio lobe of 3C33	
Crane, P., Stockton, A., Saslaw, W.C.	16
CCD photometry and dynamics of the peculiar galaxy ESO 217-G09	
Marston, A.P.	21
Statistical gravitational lensing: influence of compact objects on the number counts of quasars	
Schneider, P.	189
VLA observations of low luminosity radio galaxies. V. A detailed radio study of five jets	
Morganti, R., Fanti, C., Fanti, R., Parma, P., de Ruiter, H.R.	203
Stellar clusters and associations	
X-ray and UV observations of ω Centauri with EXOSAT	
Koch-Miramond, L., Aurière, M.	1
The galactic globular cluster system: calibration of the ratio $R=N(\text{HB})/N(\text{RGB})$	
Caputo, F., Martinez Roger, C., Paez, E.	228
Formation, structure and evolution of stars	
A study of the silicate emission features of the IRAS low resolution spectra	
Gal, O., de Muizon, M., Papoular, R., Pégourié, B.	29
The unusual radio outburst of Nova Vulpeculae 1984 No. 2	
Taylor, A.R., Seaquist, E.R., Hollis, J.M., Pottasch, S.R.	38
An evolutionary scenario for the black hole binary A0620-00	
de Kool, M., van den Heuvel, E.P.J., Pylyser, E.	47
The complex structure of Cas A. Consistent model calculations	
Contini, M.	53
Up-to-date parameters of the eclipsing triple system IU Aur	
Mayer, P., Drechsel, H.	61
Distribution of mass ratios in spectroscopic binaries	
Halbwachs, J.L.	234

Winds in collision. III. Modeling the interaction nebulae of eruptive symbiotics <i>Girard, T., Willson, L.A.</i>	247	The IRAS cirrus and the diffuse ultraviolet background <i>Jakobsen, P., de Vries, J.S., Paresce, F.</i>	335
Disc accretion by magnetized neutron stars: a reassessment of the torque <i>Wang, Y.-M.</i>	257	The Sun	
FS Lupi: a contact binary in poor thermal contact <i>Milano, L., Russo, G., Terzan, A.</i>	265	Local rigid rotation and the emergence of Active Centres <i>Mouradian, Z., Martres, M.J., Soru-Escaut, I., Gesztelyi, L.</i>	129
The strange "spots" on the T Tauri star RY Lupi <i>Liseau, R., Lindroos, K.P., Fischerström, C.</i>	274	A model of the solar wind turbulence from radio occultation experiments <i>Armand, N.A., Efimov, A.I., Yakovlev, O.I.</i>	135
Stellar atmospheres		Fine structures in solar filaments. I. Observations and thermal stability <i>Démoulin, P., Raadu, M.A., Malherbe, J.M., Schmieder, B.</i>	142
The rapidly rotating spotted red dwarf flare star Gliese 890 <i>Pettersen, B.R., Lambert, D.L., Tomkin, J., Sandmann, W.H., Lin, H.</i>	66	Microwave radiation from a dense magneto-active plasma <i>Klein, K.-I.</i>	341
The 67-min X-ray period of EX Hydrae observed with the EINSTEIN observatory <i>Heise, J., Mewe, R., Kruszewski, A., Chlebowski, T.</i>	73	Formation of the hydrogen spectrum in quiescent prominences: one-dimensional models with standard partial re-distribution <i>Heinzel, P., Gouttebroze, P., Vial, J.-C.</i>	351
A search for non-stellar contributions to the optical and near-IR flux of RS CVn binaries. I. The cases of TY Pyx, UV Psc, RU Cnc and VV Mon <i>Busso, M., Scaltriti, F., Persi, P., Robberto, M., Silvestro, G.</i>	83	The solar system	
Multidimensional radiative transfer in stratified atmospheres. V. Energy transport by radiation <i>Kneer, F., Trujillo-Bueno, J.</i>	91	Rotation and variability of the large C-type asteroid 375 Ursula <i>Schober, H.J.</i>	151
Upper limit to the boron abundance in the Population II star HD 140283 <i>Molaro, P.</i>	241	A unified treatment of polarized light emerging from a homogeneous plane-parallel atmosphere <i>Hovenier, J.W.</i>	363
Chemical modelling of molecular sources. V. IRC + 10216 <i>Nejad, L.A.M., Millar, T.J.</i>	279	The adding method for multiple scattering calculations of polarized light <i>de Haan, J.F., Bosma, P.B., Hovenier, J.W.</i>	371
Different regions of line formation in the envelope of the early emission line star HD 190073 <i>Ringuelet, A.E., Rovira, M., Cidale, L., Sahade, J.</i>	287	Meteoroids from Comet Bennett 1970II <i>Fulle, M.</i>	392
Radiation driven winds of hot luminous stars. III. Detailed statistical equilibrium calculations for hydrogen to zinc <i>Pauldrach, A.</i>	295	Celestial mechanics and astrometry	
Physical parameters for Population II stars <i>Cacciari, C., Malagnini, M.L., Morossi, C., Rossi, I.</i>	314	Statistical problems about the use of the ordinary least-squares method in astrometry. Application to the Paris-Astrolable data <i>Bougeard, M.L.</i>	156
(RN) Line profiles from moving spherical shells <i>Bertout, C., Magnan, C.</i>	319	Expansion of the disturbing force-function for the study of high-eccentricity librations <i>Ferraz-Mello, S.</i>	397
Diffuse matter in space (including HII regions and planetary nebulae)		Right ascension corrections to 120 FK 4-stars by the analysis of Time observations obtained with the Photoelectric Transit Instrument at Torino Observatory <i>Chiumiento, G., Sarasso, M., Poma, A.</i>	403
The fragmentation of molecular clouds. II. Gravitational stability of low-mass molecular cloud cores <i>Chièze, J.-P., Pineau des Forêts, G.</i>	98	Physical and chemical processes	
How abundant are complex interstellar molecules? <i>Millar, T.J., Leung, C.M., Herbst, E.</i>	109	Magnetic field and synchrotron radiation in mildly relativistic shocks <i>Courvoisier, T.J.-L., Camenzind, M.</i>	167
Barrel-shaped supernova remnants <i>Kesteven, M.J., Caswell, J.L.</i>	118	Instruments, data processing, and computational methods	
The classification of planetary nebulae <i>Faundez-Abans, M., Maciel, W.J.</i>	324	A direct surface smoothing procedure for Fourier image reconstruction in radiophysics <i>Koch, I., Anderssen, R.S.</i>	170
A 300 pc thermal spur associated with the HII region S54 <i>Müller, P., Reif, K., Reich, W.</i>	327
